

FIVE FACTORS THAT AFFECT MOON VISIBILITY

#1 MOON AGE

Moon age: the time that has passed since the birth of the moon

القمر الجديد  
(المحاق)

الهلال

New Moon - 00:00

TOTALLY DARK

09:00 Hrs Old

NOT VISIBLE

18:00 Hrs Old

IDEALLY VISIBLE

THE OLDER THE MOON, THE MORE VISIBLE IT IS.

After the new moon phase, a thin crescent appears and grows as time passes.

The more time that passes after the new moon, the chances of sighting increase.
